

Equip Your Team With the Power of How

Effective facility and equipment maintenance depends on the aggregation of many disparate data sources including the capture of institutional knowledge. Turning that information into actionable insights using the right information, at the right place, at the right time is the challenge facing every facility manager and field service technician today.

QModo AI, Inc., an Atlanta-based SaaS company, offers an easy-to-use, AI-powered content aggregation and decision support solution for facilities management and equipment maintenance. Applicable to virtually any building with equipment, QModo arms its users with “The Power of How.”

Utilized in 700 buildings and with 100,000+ assets, visual media, operating procedures, architectural drawings, and vendors, QModo continues to grow its actionable knowledge database. Solution implementations include a global CRE firm, top-tier universities, a public manufacturer, various construction related customers, hospitality properties, and a managed service provider to help deliver enhanced facilities and equipment maintenance services to their government, higher-ed, and healthcare customers.

See Value Within Days

Teams need the right know-how to increase job performance and satisfaction. With QModo, the value is threefold:

Reduce costly outages and downtime with real-time diagnostic support.

Enhance technician training to bridge the gap between senior and junior staff.

Ensure safety and compliance with proper documentation.

Transform Your Team's Efficiency and Safety with QModo AI

For Executives

Reduce FTEs

Boost efficiency and capture senior staff domain expertise to accelerate onboarding and training.

Enhance Compliance

Facilitate readiness for OSHA, Fire Marshall, and insurance inspections while improving risk management and reporting.

Mitigate Risks

Reduce costly damages and injuries by arming your team with knowledge to prevent outages and catastrophic equipment failures.

For Engineers & Technicians

Comprehensive Access

Building and equipment information, including O&M manuals and technician documentation is always right at your fingertips.

Improve Competency

Streamline new hire training with intuitive, step-by-step guidance that boosts confidence and reduces the need for extensive supervision.

Safer Workspaces

Quickly access comprehensive safety programs and protocols to prevent accidents, improve response times, and enhance overall workplace safety.

Interactive Forms and Plans

Easily document equipment details, pin locations, attach notes, pictures, and videos, and access external resources, making daily tasks more efficient and organized.

Centralized Hub

Seamlessly integrate with your existing systems and data to provide a unified platform for efficient access and management.
